

Transform Paper-Heavy Processes into Secure, Digital Workflows

At Kodak Alaris, we help banks across Africa eliminate operational bottlenecks, improve customer onboarding, and achieve audit readiness with intelligent document scanning solutions.

Our Offerings Include:

High-Speed Scanners for Back Office Operations

- S3000 Series, i4000 & i5000 Series for loan files, KYC documents, and compliance reports
- Built for 24/7 usage with high-volume throughput and advanced paper handling

Front-Office & Branch Scanning Solutions

- S2000 Series & ScanMate i940 for capturing customer IDs, application forms, and transactions at source
- Compact, fast, and easy to use at teller counters or service desks

AI-Powered Capture Software

- Kodak Info Input Solution: Centralize document intake, automate indexing, and connect directly to your core banking or ECM systems
- Capture Pro Software: Advanced batch processing, barcode recognition, and secure export to digital archives

Compliance & Data Security Built-In

- Scanners process data through volatile memory (nothing stored post-scan)
- Built-in encryption protocols and audit trails for peace of mind

Deployment Flexibility & Support

- Suitable for central operations and distributed branches
- Partner-led support available across East & West Africa

Bank Scanning Solutions – Comparison Table

Use Case	Recommended Scanner Series	Why It's a Fit
Branch-level KYC / customer onboarding	S2000 Series (S2040, S2050, S2060w)	Compact, fast, secure; supports front-desk workflows and integration
Back-office document processing	S3000 Series (S3060, S3100, S3140)	Built for reliability, bulk scanning & central operations
Compliance & audit file prep	i4000 Series (i4250, i4650)	High-resolution, intelligent capture, barcode and indexing support
Enterprise-scale digitization	i5000 Series (i5250, i5650, i5850)	Designed for nonstop 24/7 processing with advanced document handling
Remote/mobile teams	ScanMate i940	Portable, USB-powered, ideal for mobile banking units

Bank-Specific Features & Software

Solution	Purpose
Info Input Solution	Web-based scanning & routing into ECM/CRM/core banking systems
Capture Pro Software	Advanced indexing, batch processing, and compliance reporting
Smart Touch	One-touch scanning for fast branch-level use
Perfect Page Technology	Auto-enhancement for difficult documents

Deployment Models

Environment	Recommended Tools
Branches	S2000 Series + Smart Touch
Central Ops / Compliance	S3000/i4000 Series + Capture Pro
Enterprise/Head Office	i5000 Series + Info Input + Pro Software
